ABOUT ME

With a strong background as a client-side UI Developer and UX Generalist, I am passionate about creating seamless and user-centered web experiences by using a unique blend of technical expertise and design thinking.

I am experienced in user research, journey mapping, wireframing, and high-fidelity prototyping, as well as hands-on experience in custom coding web applications.

I value well-crafted, high-quality visual design with attention to detail, and I leverage prototyping skills to articulate my designs. I love tackling ambiguous problems and shaping them into clear goals.

I am certified in Design Thinking, Digital Marketing, Git, and GitHub, bringing a versatile skill set to the table. *View my certifications online:*
